

The state of the world reflects God. He is fully responsible for all events. The idea that there is a devil sabotaging God's work is immature.

God is omnipotent. The idea that God created humans with free will, and now man has 'chosen' to plunder the planet and violate human rights, is equally misguided. These ideas mean God has handed over or lost control and is no longer omnipotent. They are totally inaccurate.

THE WAYS OF GOD

God is in full control of every tiny event, thought and feeling. Nothing happens without His prior, conscious desire. What is, reflects the will of God. The purpose of the universe, and especially the human drama of evolution in consciousness, is to give God a vicarious experience of limitation. He requires all abominations to occur so that peace, beauty and freedom have real meaning and depth. This play of contrast is essential. Without suffering, life would be pleasant but superficial. This drama is misunderstood by almost everyone. Now God is revealing His ways to celebrate the end of the age of violence. The ways of the Lord are strange only when they are not fully understood.
