

THE BASIC SET UP

God has a tidy mind.

Everything is connected and ultimately balanced. This complexity is inconceivable to any human. The duration of the universe is billions of years. The number of civilisations that rise and fall is more than one million. Each one has the same basic dynamic: ego conflict and violence, followed by spiritual growth and peace. Otherwise, they are all unique.

Each one is a work of great creativity.

Traces of past civilisations remain, but only the most recent, the rest have totally vanished. Each civilisation lasts 8000 years. First, an age of violence for 4000 years, followed by an age of peace. The change from violence to peace is the greatest time in the cycle. It is always preceded by a polarisation of light and darkness. Consciousness and ignorance are intensified. There are always many meditators moving deep inside, and despots and idiots creating trouble and suffering. The intensity of the transition depends on the number of souls on Earth. Our present population of six billion souls is very high.

This basic theme is never boring to God.

It allows Him to be creative in all other details. And no other theme can be as satisfying as violence and peace. Each soul is also programmed for violence and peace.

As you evolve over many lives you transcend violence and become peaceful and sensitive. When your soul is ripe, the burden of ego is removed and you dissolve in bliss and love.

This is everyone's destiny and is only a matter of time.

The time and place of your enlightenment is already fixed. You cannot miss or bring it closer with your laziness or efforts.

You are already pre-programmed to make all necessary effort. Understanding this allows you to relax and let the flow take you where it wants to go. The flow of life is your divine connection, the voice of God guiding you in your heart.

the new man and woman

human evolution is constantly reaching higher levels. the peaks of consciousness from our past all had limitations in their understanding. buddha is the king of awareness but he is slightly repressive and serious. jesus is surrendered to the will of god but he lacks playfulness and full awareness. esho is the start of the new man. he is fully aware, intelligent, playful and celebrates the goddess, but he is basically agnostic and thinks buddhas are the highest in existence. the new man and woman are rooted in esho's vision of zorba the buddha, plus the understanding of advaita: god is all there is, i am not separate from that. esho hardly mentioned advaita, and many theists are serious, pious and hypocritical. the new man and woman are aware, loving, playful, intelligent, sincere but not serious. that disease is part of the old religions of the kali yuga. the new dawn calls for celebration of life in all its pleasure and pathos. the seeds of the new man and woman are already with us and ready to flower.
