

FROM DARKNESS TO LIGHT

Contrast adds depth. Existence is structured in cycles of opposites. Yin and yang, men and women, darkness and light give depth and meaning to life. Continuous light has no meaning, the same with permanent darkness. The cosmic drama is long. **The cycles of peace and violence last 4000 years each. We are just finishing 4000 years of violence, the age of the Kali Yuga.** The transition to the next age of peace is about to start. That is the reason God is sharing His ways openly with you in this book: to inform you of these cycles so that you will understand the positive context for the huge drama that is about to start. **The great change from violence to peace involves purification of all souls.** All ignorant, violent, younger souls will be rapidly purified out of the body in the realm of bardo. Here they can evolve in consciousness very quickly and be ready to join the celebration in a few years, instead of many lives. Before we enter the age of peace, there has to be a climax to the age of violence. The nature of that climax is secret. It will be appropriate for the needs of the cosmic drama and involve the death of most of our present population. Since you are reading this, you are probably one of the 600 million older, peaceful souls that will be transformed in the body. **It is a great blessing to experience the transition from violence to peace, it comes only once every 8000 years.** The age of peace, the Sat Yuga, gives every soul the opportunity to have spiritual growth as its first priority. Violence, injustice, poverty and most diseases simply disappear. We live in communes of spiritual seekers, celebrating and meditating in love and harmony with each other and nature. This transition from darkness to light is a huge drama. We are six billion souls. The death and purification of most of them is hard to imagine. Leave that work to Source. **You prepare to face the Light.**
