The great change heralds the New Dawn of consciousness. It is the best news for 8000 years. Every survivor will be rapidly transformed by the higher frequency of the vibration that sustains the world. This vibration has been constant for most of the last 4000 years. For the last year it has been very gradually increasing, leading to a sense of increased intensity in many sensitive people. Now, it is about to increase much more. **This vibration has two aspects: sound and light. The sound is OM, the primordial sound of the beyond. The light is consciousness, the essential stuff that the universe is made of.** Meditators and sensitive people will enjoy the new intensity to the degree that they are free from old, unconscious, negative structures. Dense, violent, ignorant souls will not be able to contain the ecstasy of the new vibration and will die in love and bliss as their nervous systems overload with Light. **Every survivor has already been selected by Source.** Everyone that dies will be rapidly purified in the realm of bardo, and reborn into the New Dawn as soon as they are ready to join the celebration. As the younger, more ignorant souls leave for purification, **the survivors start to create the blueprint for the New Dawn.** The shift is radical. **The basic social unit is the commune.** We will use existing villages and small towns to create communes. Each commune is connected to all others. All communes are an experiment to provoke God. Everyone is free to have spiritual growth as their first priority. All resources are pooled. No one works for personal gain, just to share energy and creativity. Everyone has the same abundant lifestyle. **The cleaner is as valued as the manager.** When all ignorant, violent souls have left, only then can the commune work. The commune can only function successfully with conscious, loving people as its members. **The New Dawn is of consciousness. It is the start of 4000 years of peace, love, awareness, celebration and creativity.** It is an unimaginable shift from our present violent, greedy, unjust world. No one has anything to fear. Every soul is destined for transformation and full participation in the **celebration of consciousness that is the New Dawn.**
